Bettering the Human Condition...

### 386 WALKER SHORT, ROCKER SOLE, PADDED LINER, 2 PADS, M 10.5-13.5; W:9.5-12.5

Durable and lightweight, the Coretech 386 Short Walking Boot provides protection and support for the foot and ankle during recovery from injury or surgery. The walking boot is designed for maximum patient comfort with a generously padded liner and two repositionable pads for additional cushioning around the affected area.

This walking boot includes a textured, non-slip rocker sole to promote a natural gait and easier mobility throughout everyday activities. Both short and tall walking boots feature multiple fastener straps that easily adjust to accommodate bandages. The boot also fits a wide range of shoe sizes for greater comfort.

### Fingertip Pulse Oximeter, Pediatric, 10/1/cs

The Handheld Pulse Oximeter is intended for monitoring, spot-checking of functional pulse oxygen saturation (%SpO<sub>2</sub>) and pulse rate (PR) of adult and pediatric patients in nursing homes, hospitals and home care.

- Rubber grip design offers special protection
- Compact, lightweight design for simple, one-hand operation
- High brightness LED displays SpO<sub>2</sub>, pulse rate and pulse bar
- Continuous operation for up to 30 hours
- Meets the standard for conscious sedation
- Up to 99 patients ID and 72-hour record storage
- Visual & audio alarm, low battery alarm
- Data transfer to PC for storage or printing
- Convenient 2 AA batteries (not included)
- Comes with one year limited warranty
- Available for purchase as 1 unit per box
- Suitable for the people whose finger thickness is between .35 inches and .67 inches

### DIGITAL BLOOD PRESSURE MONITOR, 5/CASE

Dynarex Digital Blood Pressure Monitors provide digital readings of systolic and diastolic pressure and pulse rates. The Blood Pressure Monitors features a 200 memory storage, while averaging the latest three, making it ideal for those who want to monitor their blood pressure everyday.

- Provides digital readings of systolic and diastolic pressure and pulse rate
- Automatic inflation with error detection
- Stores 90 most recent measurements, averaging the latest three readings
- WHO Blood Pressure Classification Indicator
- Large LCD display with low battery gauge
- 2-year warranty for automatic blood pressure monitor and 12-month warranty for cuff

## PULSE OXIMETER

### **Nellcor PM 100N Bedside SpO2 Monitor with Home Care and Sleep Study Features**

Covidien received the CE Mark from the European authorities to begin distributing the PM 100N Nellcor Bedside SpO2 Patient Monitoring System. The system provides continuous oximetry and pulse rate monitoring, offering both live readings for immediate attention and charted historical data that can reveal important trends and patterns. Alarms can be programmed to go off when oxygen saturation falls below certain levels, while the Sat Seconds feature is meant to prevent safe but seemingly dangerous events from raising unnecessary alarms.

Additionally, this is the only commercially available SpO2 bedside monitor that can be used for home care and for sleep studies performed outside the clinic. The device is able to overcome patient motion and perfusion to accurately measure blood oxygenation under most reasonable conditions.

## RESPIRONICS

### **Philips Respironics System One The intelligent solution**

Philips Respironics System One uses advanced intelligence to deliver optimum care while making patient management easier.

Respironics has consistently offered smarter tools that help sleep professionals provide better care and achieve better results. Now, based on customer input, we're delivering an even higher level of sophistication in a series of intelligent therapy devices that think and act the way you've told us they should.

Our new system is designed to deliver more than therapy; it's been created to intelligently deliver precisely what you need to manage your patients - and your practice - in today's homecare environment. The PR System One Puts all-new levels of control, compliance and efficiency right at your fingertips.

### **BiPAP S/T**

Aligned with the same platform as our System One sleep therapy technology, the Philips Respironics BiPAP S/T Non-Invasive ventilator offers a straightforward user interface and integrated heated humidification for easy setup and management.

### **AirSense 10 CPAP**

The AirSense 10 CPAP machine is designed to help you comfortably adjust to sleep apnea therapy. Featuring a sleek design and advanced comfort technology, the AirSense 10 CPAP machine will help you stay on track with your day-to-day sleep apnea therapy.

**LTV 950 Ventilator**

Innovative technology and enhanced portability merge, enabling ventilator patients to be more mobile and comfortable. The LTV 950 incorporates many of today's more advanced modes of ventilation in a versatile 13.4 lb (6.1 kg) design for maximum mobility. It features pressure control, pressure support, NPPV, adjustable flow-triggering and an apnea backup mode.

**Ease of Use**

An intuitive interface makes the LYV 950 easy to understand and operate. The unit features extensive patient monitoring capabilities and a comprehensive alarms package for optimum patient care. With a footprint and size at a fraction of comparably equipped ventilators (13.4 lbs), the LTV 950 allows for greater patient mobility.

**Oxygen Bleed In**

Low Flow / Low Pressure

**Versatile Power Options:**

- \* AC power
- \* LTV Transport Battery System
- \* LTV Universal Power Supply
- \* 3-Hour External Battery
- \* 9-Hour External Battery
- \* Automobile Lighter Adapter

**LTV 1150 Ventilator**

Whether in the hospital or in the post acute care facility, the LTV 1150 enables patients to experience the freedom to go home. Patients receiving ventilation support on the LTV 1150 extended feature set, including internal PEEP and SBT, is derived from the legendary LTV 1200 and provides a warmer new look that maintains the light weight and small dimensions of the LTV series in a modern, people friendly package.

**Feature set includes:**

- \* For patients 5kg body weight and up
- \* Presets to select the patient type, infant, pediatric or adult patients
- \* Ventilator preset optimization using the intuitive LTV 1200A INTERFACE
- \* Illuminated active controls and alarms settings for easy identification of ventilation parameters.
- \* Internal PEEP (Compensated)
- \* Spontaneous Breathing Trial
- \* Low flow oxygen connection for concentrators or flow meters
- \* NPPV

**Portable Feeding Pump/Joey**

The Kangaroo joey enteral feeding pump provides feeding and flushing in a completely portable enteral device available. It assures clinicians of accurate and reliable function while providing patients with freedom mobility.

- \* Various Formulas In House
- \* Special Order Formula Available Upon Request

**EnteraLite Infinity ENTERAL Feding Pump**

The EnterLite Infinity enteral feeding pump allows both pediatric and adult tube fed patients the ability to maintain a normal lifestyle, resulting in increased compliance with prescribed feeding regimens, Accurate: Maintains +/-5% accuracy at any flow rate and when operated in any orientation, allowing patients to comply exactly with prescribed feeding regimens.

**Portable:** Weighing less than 1 pound, the pump is easily carried in a custom-designed carry pack for extended use, resulting in fewer limitations to a patient's normal lifestyle and increased feeding schedule compliance.

**Rugged:** Designed to performed consistently well under a wide variety of conditions. Does not require any regularly scheduled maintenance and can be cleaned by simply rinsing under running water. Easy to Use; Extremely easy to operate and programm, allowing the caregiver the ability to focus on other areas of care.

Full-features set available only with the Enterallite Infinity:

- \* Operates in any orientation
- \* Bolus, continuous, and intermittent feeding programs
- \* Selectable flow rates from 0.1 ml/hr to 600 ml/hr
- \* 24-hour battery
- \* +/-5% accuracy

**Respironics EverFlo**

Compact, 31 pounds and low maintenance. Until now, oxygen concentrators have been very similar- heavy, bulky, noisy or require frequent maintenance. But EverFlo from Respironics is a unique stationary concentrator that delivers the features homecare providers want and patients deserve. EverFlo reduces operating costs with a design that is.

- Lightweight - only 31 lbs - Smaller and sleeker
- Easy to store and transport - Low maintenance
- Quiet - Simpler for patients to use and maintain

**The Freedom Series**

EverFlo is part of the Freedom Services of oxygen therapy products from Respironics designed to deliver clinically superior treatment and more freedom - freedom from worry, freedom from deliveries, freedom from complicated maintenance. Most importantly, the freedom series frees patients of some of the more demanding aspects of oxygen therapy.

**Respironics HomeFill**

Portable Oxygen M6/E Tanks  
 Filling your needs  
 Sizes: From size M6 to size E with carriers

UltraFill is an advanced home oxygen system that combines a stationary oxygen concentrator, filling station, and high-capacity 3,000 PSI cylinders to meet the needs of a wide range of oxygen patients, including those who are highly active or require continuous flow oxygen. UltraFill also has the needs of homecare providers in mind with features intended to save money by using existing inventory and lowering operating costs.

- \* 3,000 PSI Cylinder Advantage
- \* Long-lasting 3,000 PSI cylinders provide high-usage oxygen patients with >40 percent more oxygen than similar sized 2,000 PSI cylinders.

**COOL MIST HUMIDIFIER, 4 LEVELS, 4.5 L, AROMA DIFFUSER, BLACK**

- Tabletop cool mist humidifier
- Up to 15 hours of mist
- Ultra quiet with auto and night modes
- Large, easy to fill water tank
- Aromatherapy diffuser tray
- One Year Guarantee

Specification Uses:  
 To increase or maintain the indoor humidity level in a small to medium sized room  
 Dimensions: Height: 14.05" Length: 8.66" Width: 5.91" Tank capacity: 4.5 L

#### RUSCH MMG H2O Hydrophilic Closed System Catheter Kit

The MMG H2O Hydrophilic Closed System Catheter Kit maximizes patient comfort and reduces urethral trauma. The unique hydrophilic coating, activated by the integrated sterile 0.9% saline pouch, allows the MMG H2O TO glide easily through the urethra. The soft silicone introducer protects the catheter from bacteria residing in the first few centimeters of the urethra, reducing the risk of urinary tract infection. The MMG H2O Hydrophilic Closed System Catheter Kit contains sterile non latex gloves, underpad antiseptic towelette, gauze and refuse bag for convenient disposal.

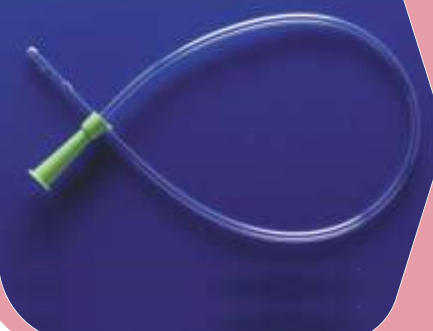

#### Rusch/MMGTM Closed Intermittent Catheter

The Rusch/MMGTM Closed Intermittent Catheter is the only clinically-proven closed system catheter to prevent urinary tract infections. 1 for more than two decades, this product has protected individuals from recurrent UTLs. Simply remove the protective cap, load the pre-lubricated catheter into the Guardian Tip Introducer, insert introducer into the urethra and pass catheter into the bladder. Available in a full range of sizes and styles, the Rusch/MMG can meet the needs of most all individuals using a closed to manage their bladder.

#### FloCath and FloCath Quick with Soft Eye tip

- \* Soft-Eye tip for ease of insertion
- \* Full range of sizes from 6-16 Fr
- \* High grade vinyl material (PVC) catheter contains in latex
- \* Compact, discrete packaging, complete with integrated saline and thumb grip to ease opening

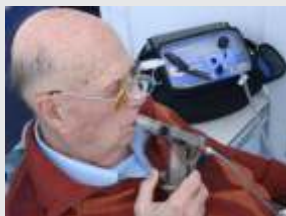

#### RUSCH EasyCath and EasyCath Kit with Soft Eye

- \* Soft-Eye tip for ease of insertion
- \* Polished recessed eyelets for maximum comfort
- \* Color-coded funnel to easily identify size
- \* High grade vinyl material (PVC) contains no latex
- \* Compact, discrete packaging

**Percussionaire IPV HC IMPULSATOR**

NEW! TRANSPORTABLE, self contained, Universal Bi-phasic IPV IMPULSATOR allows you to continue your home care cardio-respiratory Bi-phasic IPV Universal HC (home or travel) IMPULSATOR increases your clinical independence and provides you with the same IPV lung recruitment therapy (anywhere, anytime) you could receive in any major hospital if you were admitted with an acute cardio-respiratory infection.

**CoughAssist T70**

CoughAssist T70, also know as a mechanical insufflation-exsufflation devices, simulates a natural cough. It gradually delivers a large volume of air to your lungs when you breathe in (positive pressure). Once the lungs have been expanded (similar to a normal deep breath), the device quickly reverses the flow to pull secretions out (negative pressure). And, Cough Assist T70 helps keep your airways clear to reduce the chance of recurring respiratory infections. The device also incorporates a triggering feature that allows you too synchronize treatment with your own breathing patterns. Reliable & durable backed by a 3 year limited warranty.

- Portable concentrator with carrying case
- AC adaptor
- DC adaptor
- Accessory bag

**AIRVO 2 Humidifier with Integrated Flow Generator**

The AIRVO 2 sets a new standard for delivering Optiflow to patients, providing performance and convenience with its integrated flow generator and innovative oxygen delivery system.

**HIGH-PERFORMANCE HUMIDIFIER WITH INTEGRATED FLOW GENERATOR**

- \* Close to 100% relative humidity at body temperature (37 C)
- \* Dew point temperature display
- \* Precise, convenient FiO2 delivery from 21 to 80%

**VERSATILE**

- \* Variety of Optiflow interfaces for upper and bypassed airways
- \* Wide flow range (5-50 L/min) with automatic compensation for changes in patient interface
- \* Wide ambient temperature operating range

**EASY TO SET UP AND USE**

Simple controls - Integrated O2 mixing  
 Inbuilt O2 sensor - No probes or external air supply required

**VORTEX Non-Electrostatic Valved Holding Chamber**  
 Non-electrostatic metal valved holding chamber eliminates static charge and ensures patients receive a more consistent dose of medication. Delivers up to 56% more respirable aerosol than plastic spacer counterparts.

The PARI Vortex features a universal MDI receptacle and is compatible with new HFA propelled MDIs. Reimbursed by Medicaid. Child friendly character masks help improve pediatric patient compliance. Dishwasher safe and latex free.

**Philips Respironics OptiChamber**  
 Diamond valved holding chamber is suitable for all ages and is designed to help your child get an effective treatment. The chamber is made of anti-static material which suspends the aerosol medication longer giving your child more time to breathe in their medication.

**Vios Aerosol Delivery System**

The Vios Aerosol Delivery System is designed from PARI's long legacy of clinically proven products and consists of two important components: a Vios compressor and a PARI nebulizer. Vios was inspired by the Latin and Greek words for "Life" and our goal is to improve quality of "Life" and patient lifestyle through efficient aerosol delivery. The Vios delivers consistent particle size and fast treatments resulting in targeted delivery to the lungs.

**Mq6003 "Panda Style" Pediatric Nebulizer**

**Pediatric Beagle Compressor Nebulizer with Carry Bag**

**Fish Pediatric Compressor Nebulizer**

**Dexter Dragon Pediatric Compressor Nebulizer Kit**

**Veridian Claw-dia Kitty Compressor Nebulizer Kit**

## Respiroics Trilogy 100

### Respiroics Trilogy 100

**Simplicity** - Light, versatile, and easy to use, Trilogy 100 offers clinicians and patients one of life's greatest qualities - simplicity. Whether at home or in alternative care sites, the Trilogy 100 portable volume and pressure support ventilator with BiPAP technology is made for adult and pediatric (5 kg minimum) use.

**Screen Displays** - Trilogy 100 provides easy-to-read, easy-to-navigate screens with clear concise directions. It also has the option of displaying detailed readings for clinicians or simplified screens for the patient and caregiver. Either way, Trilogy 100's intuitive design allows for quick access to device settings and patient information.

**Portability**- The trilogy has been designed with portability in mind.

- . Weighs 5kg (11 pounds)
- . Internal battery/ with 3 hour external battery combined capability of 11 hours
- . Ability to connect to an external lead acid battery
- . Car charger available

**Two circuit options** - interchangeable active and passive exhalation portion blocks give clinicians the flexibility to choose the best available circuit and creates an uncomplicated applications

**Management software**- Trilogy/ provides ventilation data and prescription management through the use of an SD memory card

## SUCTION MACHINE & 50 PSI COMPRESOR

### PM65 EasyGoVac Aspirator

- . This high performance unit delivers a vacuum range of 2.21 inHg
- . The standard easy-to-read gauge
- . Battery allows 1.5 hours of run time, twice that of comparable units.
- . Standard 800 cc canister and is visible in the carry bag while unit is in operation.
- . The ABS plastic cabinet is durable, attractive, easy-to-clean and infection control friendly. There are no open areas on the unit to harbor bacteria and dirt.
- . Dual pump protection system features two safeguards. A float shut-off in the canister to protect overflow and an inline hydrophobic filter to prevent back flow of fluid as well as airborne contaminants from entering the pump
- . The easyGo vac carries a full 2 year warranty on the unit and a 6 month warrant on the battery

### HEAVY DUTY SUCTION PUMP MACHINE

Model # 18600

- . This powerful and durable suction pump combines the performance expected for an institution with the ease of operation needed for homecare use.
- . Includes 800 cc suction canister, 6` suction tube, 10` suction canister tubing, hydrophobic filter, plastic elbow connector and manual.
- . Vacuum levels up to 500 mmHg.
- . Drive 50psi

### 50 PSI COMPRESSOR

Model # 18450

- . Designed for efficient, continuous high- pressure performance.
- . Ultra- powerful compressor for both humidification and high flow, high- pressure nebulization of viscous medications.
- . Optimizes medication delivery by aerosolizing to a particle size of < 2 microns.
- . Lightweight, durable and easy-to-clean design.
- . Detachable door protect componentry.

## PORTABLE CONCENTRATORS

### SimplyGo mini system

*Key Benefits:*

*Reliable and durable*

- . Quality tested
  - . Rigorously tested
  - . It is designed and rigorously tested to be reliable and durable in real- world environments, undergoing the same testing regimen as its counterpart, the proven SimplyGo POC
- Weighs 5 lbs

**XPO2 portable Concentrator**

The new XPO2 portable Concentrator is the newest addition to Invacare's proven line of home oxygen technologies. Now providers and patients have a choice of ambulatory systems from Invacare, the world leader in oxygen. Named for its extreme portability, the XPO2 is lightweight, clinically robust, and easy to operate. The supplemental battery and AC or DC power options makes it easy for patients to go just about anywhere without the concern of running out of oxygen. Now approved for use in flight by the FAA. Learn more about **Traveling with Oxygen Reliable & durable**, backed by a 3 year limited warranty XPO 100 kit contains the portable concentrator with carrying case, AC adapter, DC adapter and accessory bag, Lightweight, easy to use, clinically robust.

**Product weight:** Approximately 6 pounds; 7.3 pounds with optional supplemental battery

**Dimensions:** 10" H x 7" W x 4" D

**Oxygen:** Pulse dose delivery with setting 1.5

**Battery:** 2.5 hour battery duration at setting 2.5 hour battery duration with optional supplemental battery available under model # XPO1 10

**Power consumption:** 36 watts at setting 2

**SimplyGo portable Oxygen Concentrator**

SimplyGo's non-clinical style and ease-of-use make it appealing to your patients. Whether it's a walk across the street, a ride across town, or a trip across a country, we've made it easier than ever for you to help patients. FAA approval pending weight: 10 lbs (45 kg) with battery.

SimplyGo comes with everything including:

Carrying case with shoulder strap and spare-battery pocket  
Detachable accessories bag

Fold-up cart with oversized wheels

Standard AC/DC power cords

**Power Wheelchair, Folding Aluminum Frame, Joystick, 260 Lbs. Foldable Long Range Transport Aid**

Powerful wheelchair with two motors  
 Folds quickly for travel.  
 Speed controls on an intuitive joystick  
 Thickly cushioned seat with movable armrests  
 Battery and charging wire included  
 Limited a 3-year warranty

**3 WHEEL MOBILITY SCOOTER, 12.4 M RANGE, 265 LB CAPACITY**

The Vive three-wheel mobility scooter, which offers safe, stable assistance, readily travels across smooth surfaces including concrete, tarmac, tile, and carpeting with a small turning radius to pass through doorways and hallways. The mobility scooter has 7.5" flat-free tires, a front-mounted storage basket for carrying everyday items, and a wide, comfortable seat with flip-back armrests. The mobility scooter has a driving range of up to 12.4 miles per charge and a top speed of 3.7 mph. A standard-sized vehicle may readily contain the power scooter's four sections after it is rapidly disassembled.

**UPRIGHT ROLLATOR - Walker with Foldable Transport Seat**

The Vive upright walker has tall adjustable grips that prevent bent shoulders and encourage good posture when walking and offers comfort and stability. Each arm rail has soft, curved armrests and textured hand grips for better control and comfort, and it is height and length adjustable. The portable aluminum walker folds up small for simple transport and weighs only about 20 pounds.

**COMMANDO CRUTCHES**

Flexible slip-resistant tip  
 Anodized aluminum alloy  
 Ergonomic shafts and handgrips  
 Patented memory technology  
 Sold in pairs  
 330 lb weight capacity

**QUAD CANE**

Large Quad Cane:  
 Base: 12" x 6.75"  
 Height Adjustable: 29.5" - 37.5"  
 Weight capacity: 300 lbs

Small Quad Cane:  
 Base: 8.75" x 5.75"  
 Height Adjustable: 28.25" - 37.25"  
 Weight capacity: 300 lbs
